ID	Título	Curso(s)	Orientador	Co-Orientador	Empresa	Área	✓	
226	Porcupine: Visualization and Analysis of Multimodal Interaction	MIECT/MECT	Samuel de Sousa Silva	-		I-Arquitectura dos Sistemas Computacionais	<input checked="" type="checkbox"/>	Ver
224	Event management and announcer system for DBOX software	MEET	Miguel Augusto Mendes Oliveira e Silva	Mariana Campos	Voltalia Portugal SA	I-Genérico	<input type="checkbox"/>	Ver
223	DESAFIOS NA ADAPTAÇÃO DO ITIL ÀS METODOLOGIAS ÁGEIS: CONTRIBUTOS PARA UMA IMPLEMENTAÇÃO PRÁTICA	MEI	Osvaldo Manuel da Rocha Pacheco	-		I-Sistemas de Informação	<input type="checkbox"/>	Ver
222	HSI Solution for High Integrity Automotive E/E Systems	MIET	José Luis Costa Pinto Azevedo	Tiago Serra	Bosch Car Multimedia Portugal S.A.	E-Electrot. Geral	<input checked="" type="checkbox"/>	Ver

GOALS AND EXPECTED RESULTS

- Create an easy to maintain platform
- Get our platform usability tested
- This platform is expected to be used by all of DETI, starting this year already
- Create a modern, renovated and user-friendly platform with new technologies
- Be able to follow all of the strict deadlines
- Create a stable code base and extensive documentation

POSSIBLE CHALLENGES

- Achieve a timely conclusion of the project
- Deal with a legacy platform and workflows
- Integration with UA IdP
- Create a platform that will endure for some years

DELIVERABLES CALENDAR

7TH MARCH

Deploy a first prototype, providing a stable implementation of the architecture, basic documentation and a test-ready implementation of the user-side design

6TH APRIL

Deliver a second release, with a defined and tested user design and a complementing server-side implementation with most features present

2ND MAY

Deliver the operational implementation with all the required features present, a finalized user design and most of the main documentation

28TH MAY

Deliver the final version of the application with bug fixes and the final highly extensive documentation
